

# EXPORTING MXF FILES FOR VIDEO SERVERS

**Click the Export tab in Adobe Premiere.** Click the Preset popup menu and choose “More presets...” Type “XDCAM HD 50 NTSC” into the Preset search box and press Enter. Choose “XDCAM HD 50 NTSC 60i MXF OP1a” from the Preset Manager. Press the “Ok” button.

**Click Location and chose C:\Users\Public\Downloads.** Change the FileName to the desired filename. Ensure the Preset is set to “XDCAM HD 50 NTSC 60i” and Format is set to “MXF OP1a.” Press the “Export” button.
